

# jak siałć mniej, a zbierać więcej?

Nasiona do siewu w programie

## KWALIFIKAT PLUS™

to wyłącznie nasiona kwalifikowane  
o podwyższonych parametrach jakościowych

informacja o Producencie nasion

nasiona o dużym potencjale plonowania

możliwość otrzymania dopłat do powierzchni obsianych kwalifikowanym materiałem siewnym w ramach pomocy „de minimis”

informacja o parametrach wartości siewnej nasion (MTZ i zdolność kiełkowania) – możliwość stosowania precyzyjnych norm wysiewu

- nasiona wyłącznie w stopniu C1
- czystość – parametry materiału elitarnego
- siła kiełkowania min. 90%

doradztwo techniczne ze strony Przedstawicieli regionalnych i hodowców firmy DANKO oraz Producentów nasion

Korzystając z Programu **KWALIFIKAT PLUS™** wybierają Państwo nasiona o podwyższonych parametrach siewnych. Stosując precyzyjne normy siewu używają Państwo mniej nasion i obniżają koszty produkcji.

Ustalanie prawidłowej ilości wysiewu nasion

Wzór:  $\frac{\text{MTZ} \times \text{obsada}}{\text{siła kiełkowania}}$  = ilość wysiewu w kg/ha

**MTZ** – Masa Tysiąca Ziaren (g)

**obsada** – to liczba roślin na jednostce powierzchni (szt./m<sup>2</sup>)

**siła kiełkowania** – określona dla nasion kwalifikowanych  
**MINIMUM 85%** (dla pszenżyta 80%)

Przykład wyliczenia ilości wysiewu w zależności od siły kiełkowania:

$$\frac{45\text{g} \times 350 \text{ szt./m}^2}{85\%} = 185 \text{ kg/ha} \quad \frac{45\text{g} \times 350 \text{ szt./m}^2}{95\%} = 165 \text{ kg/ha}$$

Szczegółowe informacje o zaletach programu

**KWALIFIKAT PLUS™**

- można uzyskać:
- u Producentów nasion
  - u Przedstawicieli regionalnych DANKO

tel. 601 400 864

tel. 669 767 757

tel. 601 542 324

[www.danko.pl](http://www.danko.pl)

Stosowanie materiału siewnego **KWALIFIKAT PLUS™** o wyższej sile kiełkowania daje oszczędność nasion **aż 20 kg na I hektarze !!!**
